Re: Palestine-Hollansburg Joint Sewer District
Centralized Wastewater System

After many discussions with the funding agencies that are supporting this project, they now cannot develop a method to award and fund Contract B with grant monies at the date proposed. Therefore, the only option that remains is to halt the bidding process so the Sewer District does not have to accept loan dollars in place of these grant funds. Additional loan dollars would obviously have a large financial impact on their residents.

The funding sources have committed to a re-advertisement of the entire project as one contract at the end of June with bids being accepted the first part of August. This will allow all grant funds to be available and utilized with the project. A bid award is projected for the first of October. When the advertisement is published, all contractors that have purchased the bidding documents will automatically receive the new documents at no cost in the same version of which they initially received (i.e., electronic, hard copy, etc.).

We appreciate your interest and apologize for this inconvenience.

Thank you.
